Ready for
sales in 2017

What Is Laparoscopic Surgery?

Surgeon makes small holes in the abdomen to insert instruments. To create the holes, the surgeon uses a device called a **trocar**.

The Problem with Laparoscopic Surgery

Closing the holes (“ports”) is **difficult and takes time**. It is highly recommended to close the 10+ mm ports.

Incomplete site closure can lead to complications such as hernias.

Gordian's TroClose1200™

TroClose1200

It's a win-win for patients,
hospitals, and surgeons.

25 Successful Surgeries

“TroClose1200 functioned very well. To summarize, I am very pleased with the device.”

Dr. Geron, Poriya Medical Center, Israel

“The TroClose1200 would be a great asset for any bariatric surgery.”

Dr. Ugale, Asian Bariatrics Hospital, India
