

TroClose1200™

Novel Trocar with
Integrated Closure System

Safe • Easy • Efficient

The Product & Advantages

Gordian Surgical has developed a trocar with integrated closure system that offers surgeons a safe, easy and efficient solution to opening and suturing laparoscopic incisions.

Instead of inserting fascia closure sutures at the end of a procedure, Gordian's uniquely designed

"two-in-one" trocar automatically inserts sutures into the tissue surrounding the trocar at the beginning of the procedure. When the trocar is removed, the physician easily closes the fascia by tying the sutures.

Safe

Reduced risk of organ damage

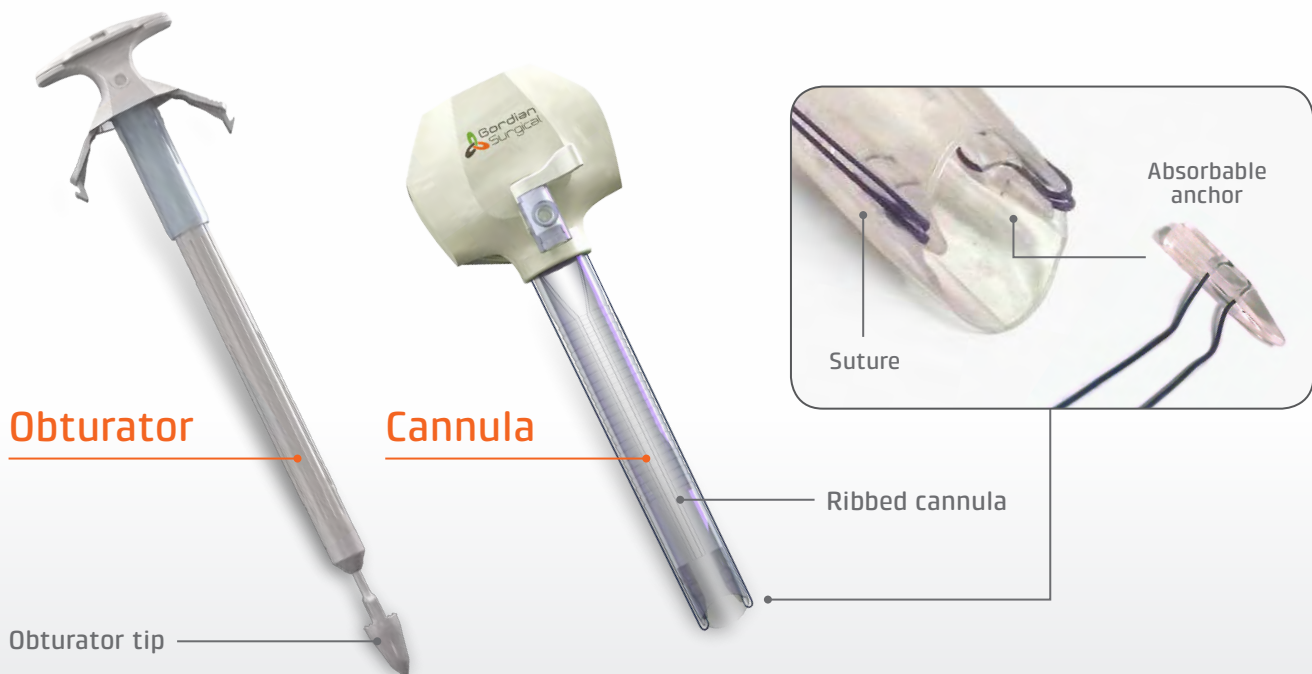

Easy

Secure, elegant port closure

Efficient

Saves time in every operation

Technical Specifications

- 12 mm bladeless trocar
- 115 mm ribbed cannula
- Single-use only
- EtO sterilized

- Fully absorbable PLGA anchors
- Braided PGLA absorbable sutures (similar to USP 0)

Available as cannula and obturator (GSTC1200) or cannula only (GSTC1200C)
