Improved Care
Enteral Feeding Device

Shahar Millis, MBA
CEO
Trendlines Medical Asia Road Show
July 2016
Enteral Feeding
Long-Term Solution for Adequate Nutrition

- Cancer
- Stroke
- Neurological conditions
Dislodge | Clog and Degrade | Dislodge
---|---|---
Long, Heavy Tubes | Skin Conditions | Pain; Urgent Hospital Visits

Significant Reduction in Quality of Life
Fidmi’s Low-Profile Enteral Feeding Device Improves Quality of Life
Fidmi’s Added Value

Patients
Better quality of life
No painful replacements
No clogging

Caregivers
Easy to handle and safe
Saves time – no declogging
Reduced complication rate

Hospitals
Reduced ER visits
Reduced costs

Partners
Ongoing patient commitment / brand loyalty
Larger margins on disposables
Great Feedback From Leading Physicians

“I love the idea, concept, and device. I think you can create a MAJOR paradigm shift in these devices.”

Stephen M. Cohen, MD, FACS, FASCRS; Hunter Holmes McGuire VA Medical Center, Richmond, Virginia

“Unique, interesting and innovative design. Could be a dynamic change in the way we do PEGs.”

Amol Bapaye, MD, FASGE, FSGEI, FAIGE; Deenanath Mangeshkar Hospital & Research Centre, Pune, India

“I like a number of aspects of your design, in particular the enteral bumper stabilizer.”

Shelby Sullivan, MD, Ass’t. Prof. of Medicine; Dir., Bariatric Endoscopy, Washington University in St. Louis

“...fall away pieces are unique and intriguing... I like the bumper raised off the skin”

Bret T. Petersen, MD, Prof. of Medicine; Mayo Clinic Div. of Gastroenterology and Hepatology, Rochester, Minnesota
Millions of Tubes Inserted Each Year

- $>1.3$ million tubes placed in new patients
- $4$ million tubes replaced with new tubes in existing patients
US$540 Million Market and Growing

Market Value (Million US$)

PEG, Low Profile & Gastrostomy Market
